

Intimate Partner Violence & COVID

Audio COVID quick-release checklist

Last updated 5/4/2020

Checklist

Intro standardization

Learned experiences from COVID "shorts" for multi-RAP publication and audiences who may not be familiar with the hosts: please introduce ourselves and also refer people back to our site. Not in a self-promotional way...but in a genuine..."hey check out what other resources we have". So that if they hear it as a stand alone piece on SoMe they realize there is more stuff on here. Please see attached and add your samples to it, so we can all exchange and share with all: https://docs.google.com/document/d/1qHphAHY153y_LyI0XE8IOLeICUWLg_HWI5ISMLoeb0/edit

Please make sure intro/outro recording(s) is/are incorporated in your CE'd file before submitting for DE.

Marketing Assets

- Please identify guest Twitter/Facebook/Instagram handles here (if permission obtained):
- Please identify brief points or message that you would like to highlight, and the marketing team will work that message into character constraints

Although the focus has been on whether there has been an increased prevalence of IPV during the pandemic, in some ways it is more important to understand how survivors experiences have changed due to the social isolation and restrictions introduced during the pandemic, and how the pandemic has increased stressors such as poverty that compound IPV. With the rapid conversion to telehealth it is also important to consider alternative tools to ensure survivors receive needed resources.

Site Assets

- Navigate to the share [COVID Google Folder](#) and create a copy of this template to store in that folder
- Please submit the following assets to Kat Levine (@klevine) on Slack at the time of submitting your CE'd file; until these assets are received in this format, your piece cannot be published on the site/app

Written Assets Template

Title: COVID-19 and Intimate Partner Violence

Summary:

In this Hippo Education bonus, Dr. Lisa Patel and Dr. Maya Ragavan discuss intimate partner violence (IPV) in the context of COVID-19. While data has focused on prevalence, they dive into how the pandemic has changed survivors' experiences, access to resources, approach to safety planning, privacy concerns, and survivor resilience. They also discuss alternative means of counseling families for IPV in the setting of increased telehealth, where survivors may not be in a private place to disclose an abusive relationship.
